MAIN FACTS AND HIGHLIGHTS

- Research interests focused on **cybersecurity**, in particular on the identification of current and future threats. I focus on (large scale and automated) malware analysis, cyber-physical security, extraction of threat intelligence from large-scale datasets, and financial frauds. I associate to this an extensive experience in offensive security.
- Publication track: 102 papers on journals and conferences. Among the conferences, two publications at IEEE Security and Privacy (absolute top conference in the area, acceptance rate around 9%, one with 125 citations), and two at ACM CCS (the competing top conference). Two publications at WWW (top conference in the Web research area, acceptance rate average 12%). Several publications at tier 2 conferences such as ACSAC, RAID, DIMVA. According to Google Scholar: 4990 citations (2750 since 2018), H-index 35, i10-index 81. According to SCOPUS, 2339 total citations and H-index 25. Most cited articles on conferences have 345 and 310 citations. In addition to the publication track, I have been an invited speaker at tens of industrial and hacking conferences around the world.
- Service in the IEEE: elected three times as a member of the Board of Governors of the Computer Society; also served as member of the MGA board, and of Region 8 committees. In the ISSA (Information Systems Security Association), founding member of the Italy chapter, I served for 11 years on the International Board of Directors, and was named a Fellow in 2014.
- Research funding: principal investigator for several national and international projects (funded by the European Commission and NATO), as well as industrial research. Between 2008 and 2021 my research received over 2.5MEUR of funding from different external entities.
- I have been the general chair of a number of conferences, notably ITASEC 2018, ESSoS 2015, EC2ND (2009 and 2010), as well as the program chair for IEEE CSS 2015 and 2016.

I also served on the program committee of a number of conferences and workshops, notably WWW/TheWebConf, RAID, ICISS, SAC, TrustCom, SAFECOMP. I am on the editorial board of the “Journal of Computer Virology and Hacking Techniques” (Springer-Verlag) since 2005, “Computers and Security” (Elsevier) since 2017, “IEEE Transactions on Emerging Technologies in Computing” since 2017. Since 2011 I have been on the Reviewer Board of the prestigious industrial conference “Black Hat”.

- I have advised 7 PhD student in the past, and I am currently advising 3 PhD student. I have been a professor for 50 courses between 2006 and 2020 (at bachelor, Master’s, and PhD levels). I have been the coadvisor or advisor of over 150 bachelor and master’s theses.
- Industrial technology transfer experience (founding three startups), as well as practical experience in computer forensics in criminal and civil cases.

ACADEMIC POSITIONS

- 12/2022– Full Professor, Dipartimento di Elettronica, Informazione e Bioingegneria, Politecnico di Milano.
- 07/2015–12/2022 Associate Professor, Dipartimento di Elettronica, Informazione e Bioingegneria, Politecnico di Milano.
- 07/2008–06/2015 Ricercatore di ruolo MIUR (equivalent to Assistant Professor), Dipartimento di Elettronica e Informazione, Politecnico di Milano.
- 06/2006–05/2008 Assegnista di Ricerca (post-doc researcher), Dipartimento di Elettronica e Informazione, Politecnico di Milano.
- 03/2006–05/2006 Research Assistant, “FIRB-PERF” project, Dipartimento di Elettronica e Informazione, Politecnico di Milano.
- 03/2003–02/2006 PhD student, research assistant, teaching assistant and contract professor, Dipartimento di Elettronica e Informazione, Politecnico di Milano.

EDUCATION

- 03/2003–02-2006 Ph.D. degree in Computer Engineering, Dipartimento di Elettronica e Informazione, Politecnico di Milano, Milano, Italy, final evaluation “A – cum Laude” (final exam on 18/05/2006).

Thesis title: *Unsupervised Learning Algorithms for Intrusion Detection.*

Advisor: Prof. G. Serazzi.

- 09/1997–12/2002 Laurea (Vecchio Ordinamento) in Computer Engineering (equivalent to an M.Sc. degree), graduation date 20/12/2002, Politecnico di Milano, Milano, Italia; final grade 100/100 “cum laude”

Thesis title: *Un sistema di intrusion detection basato sull’apprendimento non supervisionato.*

Advisor: Prof. S. M. Savaresi.

Coadvisor: Prof. G. Serazzi.

INDUSTRIAL AND SPINOFF EXPERIENCE

- 2016–today Co-founder of BankSealer, a university spinoff delivering novel fraud detection solutions for banking and payment systems, based in Milano, Italy.
- 2011–2020 Co-founder of 18Months Srl, a startup delivering cloud-based ticketing solutions for cinemas, based in Milano, Italy. Privately acquired in 2020.
- 2004–today Honorary President and founder of Secure Network Srl, a computer security consulting firm based in Milano, Italy. I co-founded Secure Network in 2004, and it was acquired by BVTech Group in 2018. As of 2022 Secure Network employs 20 full time employees, and has a yearly revenue of 2.5MEUR+.
- 1998–2005 Technical writer for IDG Communications and others.

My research has been always focused on the field of computer security traditionally known as “systems security” and which is now evolving in the so-called “cybersecurity” area. In particular, I moved from intrusion detection to malware analysis and threat intelligence and characterization, and more recently to the security of cyber-physical systems. In addition, I found over the years that several of the most successful and satisfactory research activities were born from interdisciplinary ideas, or from needs and challenges coming from colleagues from different fields.

CURRENT RESEARCH FOCUS

My current research interests focus on current and future cybersecurity threats. Part of my most recent activities are related to strategical and political issues of cybersecurity and cyberwarfare (both through publications such as [A17], and through leadership in organizations such as chairing the IEEE Computer Society’s STC on Cybersecurity).

Cyber-physical security: My most current area of focus is cyber-physical security [A12] [D15]. We are pursuing two different areas of investigation. On the one hand, we are working on the security of the so-called Industry 4.0 paradigm [A10] [D10] and more generally of industrial control systems [D6]. Our most impressive result to date is the first comprehensive assessment of the attack surface of industrial robots, published in the top-conference IEEE Symposium on Security and Privacy [D23]. On the other hand, we are addressing automotive security issues, with results on the security of CAN bus [D22] [A7] [A9] and on security-by-design approaches [D11] [A19]. Recently, I started being interested in the security of medical devices [A8] [A12].

Malware analysis: My earliest interest in malware research was computer virology, i.e. the modeling of the spread of computer viruses ([A26], [B1]). Afterwards, I was one of the first who analyzed the likelihood of success of Bluetooth viruses ([A25],[D62]) and concluded it just was unlikely ([A22]).

Inspired by this line of research, I moved on to explore automated malware analysis, and in particular how it could be made more efficient to cope with the growing wave of malicious samples we are seeing every day ([D57]). This led to one of my most important publications ([D59]), Reanimator, a system to combine static and dynamic analysis to find dormant code in large datasets of malicious samples, and more recently to the behavior-based analysis methods of JackDaw [D31] [D21]. Other research results of note are related to the characterization of malware evolution [D47], to the tracking of DGA-based malware [D38], to the automatic analysis of modern evasive malware [D21], and to the automatic and malware-agnostic extraction of WebInject signatures [D37],[A13].

Motivated by this last result, we focused further on the analysis of financially-motivated malware, specifically of banking trojans and ransomware, in order to help end-users against these widespread threats. We created techniques to analyze and automatically counter ransomware in the context of both mobile devices [D30] and Windows machines [D24].

I have also extensively worked on Android malware. Starting the development of “AndroTotal”, a publicly available platform to analyze suspicious APKs with multiple antivirus apps for the Android system [D44],[A15]. Using AndroTotal we were also able to implement AndRadar, a system for fast discovery of Android applications on alternative markets [D39].

Data analytics and threat intelligence: A recurring theme of my research is the usage of anomaly detection, visualization and data analytics techniques to extract actionable intelligence from large datasets of security-relevant phenomena. Sometimes this extends to collecting the datasets first: for instance we collected and analyzed datasets on malicious abuses of URL shorteners that led to two publications at the highly selective WWW conference ([D45],[D42]).

We also ran campaigns of scanning and analysis to estimate the prevalence of, e.g., misconfigurations in cloud-based systems [D7] [D16].

Sometimes we devise clever ways of obtaining threat intelligence from publicly available data. For instance we devised a system to extract intelligence on DGA-based botnets from passive DNS data [D38], and a system to de-anonymize and tag Bitcoin users [D41] that attracted the interest of international press.

The collection of malware datasets that supports some of our previously-described research also partially falls in this area ([D57], [A15]). Other areas we explored are phishing [D56] and social network privacy and security [D35].

Financial Fraud: Financial fraud is a growing area of concern and interest. Thanks to an industrial research relationship, we could access an extensive dataset of financial transactions, which we used to develop BankSealer, a fraud analysis and decision support system targeted to on-line banking environments [D40]. This paper received a best paper award, and had several followup works [A16] [D20] [A11] [D9]. It also led to the launch of a spinoff company (BankSealer, www.banksealer.com). In a way, our previously mentioned work on Bitcoin [D41] is also related to this area.

Attack papers and offensive research: Systems security is unique in offering opportunities to conduct “offensive” security research, leading to attack papers describing fault in widespread or important technologies. The most significant result in this area was breaking Facebook’s social authentication system ([D46], [D35]), which led to a paper (describing both the attacks and a secure design solution) in the selective CCS conference [D34]. Another interesting work demonstrated the weakness of the iOS input system to snooping [D51]. We demonstrated practical attacks against Android’s Intent Message Passing [D32]. We are working on automated attack generation as well [D4].

SCIENTIFIC BACKGROUND

My PhD and my early years of post-doc research were mostly focused on intrusion detection, and in particular on the application of unsupervised learning techniques to anomaly detection. My seminal work in the area is [D75], to date my most cited paper, detailing a two-tier architecture for network anomaly detection which could take into account anomalous packets. This was a very novel intuition, and I worked on it through several subsequent publications, analyzing its payload detector [D70], improving its performance [D72], up to the design of a complete system named ULISSE ([D65], [D64]). I then moved on to the application of learning techniques to host-based detection through system call sequence and arguments - as opposed to sequence alone, which was the limit of previous literature. This led to a publication in the IEEE Transactions [A20], as well as another journal [A23] and conference publication [D61]. I also briefly explored the usage of multiagent techniques such as cooperative negotiation to perform network anomaly detection [D63], [D58], as well as detection of attacks on web infrastructures [D60] [D55].

Another important area I tackled was the correlation of alerts [D67] and their aggregation and false positive reduction [A21]. In this area I also oversaw the successful doctoral thesis of Dr. Federico Maggi (which was tied to publications [D67], [D61], [D58], [D48], [A21]). I also gained expertise in the intricacies of evaluation of IDS and IPS technologies [D68].

I have also explored in several directions the modern challenges to file reconstruction, applying clustering and classification techniques to file carving ([D52], [D49]) as well as studying in-depth the impact of the introduction of SSD disks on forensic analysis ([A18], [D43]). An earlier research work dealt with the rising issue of encrypted hard drives ([D66]).

RESEARCH COLLABORATIONS

Besides the research connections related to joint projects listed in the following section, it is important to outline the following, ongoing and long-term research collaborations:

- Prof. S. Bratus of Dartmouth college: joint initiatives in the cybersecurity, cyberwarfare and policy areas [A17].
- Prof. E. Markatos and S. Ioannidis and their research group at FORTH: joint research on several areas, including mobile malware and social network security [D34], [D35], [D46]
- Prof. A. D. Keromytis of Columbia University: social network security research [D34], [D35], [D46]
- Prof. L. Cavallaro at King’s College London: joint research on DGA-based botnets and on mobile security [D38]
- Prof. C. Kruegel and G. Vigna at UCSB: joint research on malware analysis, as well as on emerging Internet threats [D42], [D45], [D59], [D27], [D4]
- Prof. E. Kirda at Northeastern university: joint research on malware analysis, as well as a new research project on kernel-based attack mitigation [D59]

RESEARCH FUNDING

2020-2023	BVTech Spa funded with 300kEUR my research group at DEIB, for research on several cybersecurity subjects.
2017-2019	Project UCSA: Principal Investigator. BVTech Spa and the Italian Ministry of Economic Development financed the project with approximately 150kEUR for my group at DEIB.
2017-2019	Project “FilieraSicura”: Local Principal Investigator. Cisco Systems and Leonardo financed the project, with approximately 100kEUR for my group at DEIB.
2016-2020	European H2020 Project “RAMSES”: Local Principal Investigator. The European Union financed the project with approximately 3MEUR, 280kEUR of which for my research group at DEI.
2016-2020	European Marie Curie RISE Project “PROTASIS”: Local Principal Investigator. The European Union financed the project with approximately 3MEUR, 320kEUR of which for my research group at DEI.
2013-2016	PRIN project “TENACE: Protecting National Critical Infrastructures From Cyber Threats”: Local Principal Investigator. The Italian Ministry of University and Research financed the project. Financing received: 77kEUR for my research group at DEIB.
2010-2014	European Network of Excellence “SysSec”: Local Principal Investigator. The European Union financed the project with approximately 3MEUR, 320kEUR of which for my research group at DEI.
2011-2012	European CIPS Project “i-Code”: Local Principal Investigator. The European Union financed the project with approximately 540kEUR, 110kEUR of which for my research group at DEI.
2010-2011	NATO Science for Peace project Sfp-983805, “SCADA-NG”: NATO Project Director. The project has been financed with a NATO grant of approximately 250kEUR , to be shared with our partner, University of Zagreb.

2008-2011 European Project STREP FP7-ICT-216026-WOMBAT “Worldwide Observatory on Malicious Behaviors and Attack Threats”: Participant and local Research Coordinator. The European Union financed the project with **2.9MEUR, 290kEUR** of which for my research group at DEI.

ASSOCIATION ACTIVITIES AND SERVICE

2001–today IEEE Computer Society

- 2020-2022 Board of Governors elected member
- 2020-2021 Member of Diversity&Inclusiveness committee
 - 2020 Nominations Committee member
 - 2019 Young professionals society representative
 - 2019 Publications board, secretary
- 2013-2018 Board of Governors elected member
 - 2016 Audit committee member
 - 2015-2020 Cybersecurity Special Technical Community chair
 - 2015-2017 Constitution and Bylaws committee member
 - 2014 Publications ad-hoc committee
 - 2012 Region 8 Membership Development Coordinator
- 2010-2012 Italy chapter chair
- 2008–2009 Italy chapter vice-chair

2001–today Institute of Electrical and Electronics Engineers

- 2022– Digital Privacy Initiative, co-chair
- 2018– European Public Policy Committee, member
- 2019 Future Directions Committee, member
- 2017 MGA Board, IT Coordination And Oversight Committee Chair
- 2014-2018 MGA Board, IT Coordination And Oversight Committee member
 - 2014 Region 8 Conference Coordination Subcommittee (CoCSC)
- 2011-2012 Region 8 Publications Coordinator
- 2009-2013 Section Italy, Educational Activities chair

2005–today ISSA (Information Systems Security Association)

- 2022–today International Board of Directors, elected member
- 2008–2016 International Board of Directors, elected member
- 2005–2012 Italy chapter, Board of Directors
 - 2005 Founding Member, Italy chapter

2005–today Milan’s order of chartered Professional Engineers

- 2008–today Standing Committee on Information Engineering, appointed member

2000–today National Order of Journalists, associate member;

ACADEMIC SERVICES AND RESPONSIBILITIES

2022–today	Member of the board of the Information Technology PhD course, Politecnico di Milano
2019–today	Co-Director, M.Sc. degree “Cyber Risk Strategy And Governance”, jointly offered by Politecnico di Milano and Bocconi University.
2014–today	Node coordinator for POLIMI, CINI National Cyber Security Lab
2013–today	Director, “Security Specialist” specialization degree (“Master universitario di primo livello”) at Politecnico di Milano.

AWARDS AND RECOGNITIONS

2022	Google Cloud Research Innovator
2022–2024	IEEE Computer Society Distinguished Visitor
2021	IEEE Computer Society Distinguished Contributor
2020	National habilitation to full professor (SSD ING-INF/05)
2020	ACM Distinguished Speaker Program
2015	National habilitation to associate professor
2014	Best paper award for paper [D40], “BankSealer: An Online Banking Fraud Analysis and Decision Support System” at the 29th IFIP International Information Security and Privacy Conference
2014	ISSA Fellow
2013	IEEE Computer Society Golden Core Award
2012	ISSA Senior Membership
2012	ACM Senior Membership
2011	Best paper award for paper [D53], “BURN: Baring Unknown Rogue Networks”, at the 2011 Symposium on Visualization in Computer Security (VizSec).
2010	IEEE Senior Membership
2003	Cisco’s “Best Technical Journalist” award

TUTORIAL LECTURES

- F1. S. Zanero. Modeling the spread of computer viruses: aiming at a moving target. VCON 10 International Conference, Warangal, India, December 2010.

SCIENTIFIC AND ORGANIZATIONAL ACTIVITIES

EDITORIAL SERVICES

- Editorial board of “International Journal of Information Security”, Springer Nature, since 2022
- Associate editor, “IEEE Transactions on Emerging Topics in Computing”, since 2017
- Editorial board of “Computers&Security”, Elsevier, since 2017
- Editorial board of “Frontiers in Big Data”, “Cybersecurity and privacy” specialty, 2018–2022
- Guest Editor, “Computer” Magazine, Special Issue on “Cyber-physical systems” (scheduled for 2017)
- Guest Editor, IEEE Transactions on Emerging Technologies in Computing, Special Issue on “Emerging Topics in Cyber Security”
- Editorial board of the “Journal in Computer Virology”, now “Journal of Computer Virology and Hacking Techniques”, Springer-Verlag, since 2005
- Editorial board of “Ciberspazio e Diritto”, Mucchi Ed., since 2012
- Editorial board of the “Encyclopedia of Computer Science and Technology”, Taylor&Francis, since 2013
- Guest Editor, “Upgrade”, journal of CEPIS (Council of European Professional Information Societies), special issue on “Business Continuity and Security”, 2005

CONFERENCE ORGANIZATION

- General Chair, Italian Cybersecurity Conference, ITASEC, 2018
- General Chair, Engineering Secure Software and Systems, ESSoS, 2015
- General Chair, SysSec Workshop, 2013–2014
- General Chair, European Conference on Computer Network Defense (EC2ND), 2009–2010
- General Chair, ISSA International Conference, 2009–2017
- General Chair, OSSCoNF – International Workshop on Open Source Software for Computer and Network Forensics, 10/09/2008, Milano, Italia
- General Chair, WOMBAT Workshop on Internet Security Threat Data Collection and Sharing, 21-22 April 2008, Amsterdam, Vrije Universiteit
- Program Chair, 7th International Symposium on Cyberspace Safety and Security, IEEE CSS 2015, Aug. 24–26 2015, New York, USA.
- Steering Committee member, Italian Cybersecurity Conference (ITASEC)

- Reviewer, H2020 projects, European Commission DG Connect
- Reviewer of Scientific Projects (PRIN) for MIUR
- Reviewer of Scientific Projects for the Autonomous Province of Trento.
- Reviewer for the international journals “ACM Computing Reviews”, “IEEE Security&Privacy”, “Performance Evaluation”, “Journal of Systems Architecture”, “ACM Transactions on Information Systems Security”, “International Journal of Information Security”, “IEEE Transactions on Dependable and Secure Computing”, “IEEE Transactions on Computers”, “Computers and Security”, “Journal of Computer Security”, “IEEE Transactions on Information Forensics & Security”, “Information Processing Letters”.

OTHER SERVICES

- G7 Multi-Stakeholder Expert Workshop “Strengthening G7 Coordination on Supporting International Standardisation for the Digital and Green Transformations”
- Representative of Politecnico di Milano in the Stakeholder Cybersecurity Certification Group (SCCG) of the European Commission
- Member of the European Commission expert panels on medical devices and in vitro diagnostic medical devices (‘Expamed’)
- Chairman of the Jury, 2019 Artificial Intelligence in Security Challenge, Abu Dhabi Cyber Week.
- European Society of Cardiology EU Regulatory Affairs Committee on Medical Devices & the European Health Rhythm Association (EHRA) Task Force on security and privacy of remote monitoring of implanted devices
- Doctoral jury, Mr. Guillaume Brogi, CNAM, Paris, France.
- Doctoral defense committee, Mr. Simone Libutti, Mr. Pietro Fezzardi, Mr. Davide Quarta, Mr. Andrea Continella, Mr. Alessandro Di Federico, Politecnico di Milano, Italy.
- Doctoral defense committee, Mr. Michele Carminati, Mr. Mario Polino, Mr. Matteo Ferroni, Politecnico di Milano, Italy.
- Grading committee, doctoral defense of Seyed Mohammad Khodaei, KTH, Stockholm, Sweden.
- Doctoral defense committee, Mr. Iason-Stylianios Polakis, University of Crete, Greece.
- Representative of Politecnico di Milano in the Vision2020 initiative, for the Security research line
- European Project FORWARD (www.ict-forward.eu), working group on Smart Environments threats (<http://www.ict-forward.eu/wg/smart-environments/>), 2008–2010
- PROCENT (Priorities of Research On Current and Emerging Network Technologies) expert group of ENISA, 2009–2010
- Working Group AICA/CEPIS on the EUCIP certification – module 5 “Information Security”

TEACHING ACTIVITIES

- Director (and creator of syllabus and course structure) of the “Security Specialist” specialization degree (“Master universitario di primo livello”) at Politecnico di Milano
- Co-director of M.Sc. degree “Cyber Risk Strategy And Governance”, jointly offered by Politecnico di Milano and Bocconi University.
- I have been a professor for the following courses (at bachelor, Master’s, and PhD levels):
 - “Progetto di Impianti Informatici” (2005/2006, 2006/2007, 2007/2008) (I livello - B.Sc.)
 - “Impianti di Elaborazione” (2007/2008) (I livello - B.Sc.)
 - “Impianti Informatici” (2008/2009) (I livello - B.Sc.)
 - “Progetto di Ingegneria Informatica” (2009/2010, 2018/2019) (I livello - B.Sc.)
 - “Sicurezza delle Applicazioni Informatiche” (2008/2009) (II livello - M.Sc.)
 - “Computer Security” (2009/2010, 2010/2011, 2011/2012, 2012/2013, 2013/2014, 2014/2015, 2015/2016, 2016/2017, 2017/2018, 2018/2019, 2019/2020, 2020/2021) (II livello - M.Sc.)
 - “Informatica Forense” (2011/2012, 2012/2013, 2013/2014, 2014/2015, 2015/2016, 2016/2017, 2017/2018, 2018/2019, 2019/2020) (II livello - M.Sc.)
 - “Privacy and Security” (2011/2012, 2012/2013, 2013/2014, 2014/2015, 2015/2016, 2016/2017, 2017/2018) (II livello - M.Sc.)
 - “Advanced Topics in Computer Security” (2010, 2012, 2013, 2014, 2015, 2016, 2017, 2019) (Ph.D. course)
 - “Advanced Cybersecurity Topics” (2019/2020, 2020/2021) (II livello - M.Sc.)
 - “Cybersecurity Technologies, Policies and Procedures” (2019/2020, 2020/2021) (II livello - M.Sc.; jointly taught with Bocconi University)
 - “Digital Forensics and Cybercrime” (2020/2021) (II livello - M.Sc.; jointly taught with Bocconi University)
- I have been a teaching assistant in 18 courses between 2003 and 2009.
- I have been the coadvisor or advisor of over 150 bachelor and master’s theses at Politecnico di Milano, the University of Illinois at Chicago, the Technical University of Eindhoven, University of Milan, and the University of Milano-Bicocca.
- I have advised 7 PhD students (three of them “cum laude” and one “with honors”):
 - Dr. Federico Maggi (currently a researcher at Huawei)
 - Dr. Mario Polino (currently an Assistant Professor at Politecnico di Milano)
 - Dr. Michele Carminati (currently an Assistant Professor at Politecnico di Milano)
 - Dr. Davide Quarta (currently a vulnerability researcher at Qualcomm)
 - Dr. Marcello Pogliani (currently a security engineer at Secure Network)
 - Dr. Andrea Continella (currently an assistant professor at University of Twente)
 - Dr. Stefano Longari (currently a post-doc at Politecnico di Milano)
- I am currently advising 3 PhD students (M. D’onghia, A. Bellante, L. Binosi).
- I have also lectured at the University of Milan, University of Rome “Tor Vergata”, and at the LaSalle University of Barcelona, Spain.
